We have now a CNG Trial Vehicle with CTA & the test results are very promising.

For the environment & the fact that Egypt is now a main producer of the CNG, CNG vehicles is an ideal solution as a first step to move towards the Euro Emissions standards without the need of any subsidies as in case of Diesel Fuel.

C127 CNG

- Coming to Electric Vehicles, we are now in the development phase of EV City Bus which will be ready next year for the Local Market.
- Overnight Charging or Opportunity Charging is a key point in our design which needs to be well defined & decided as it specifies accordingly the type of batteries & the total carrying capacity of the whole vehicle plus to the final cost of the product.

A faint, light-colored world map is centered in the background of the slide. The map is composed of a grid of thin, parallel lines, creating a textured effect. It shows the outlines of the continents in a light gray tone.

Thank you
